

KARPO FLY

ARROW X-Alps is the newest KARPO FLY harness that is developed from the most up to date materials with use of the most innovative technology. Application of SKYTEX material and DYNEMA straps turned out to be the best choice! Thanks to the combination with innovative inflatable back protector, we managed to achieve the harness weight of unbelievable 1,55 kg !!! And this all was achieved with keeping really big comfort for the pilot. With little exaggeration we can say that ARROW X-Alps is the lightest and the most comfortable harness in the world!

ARROW X-Alps
