

KARPO FLY

New METEOR 2 is very comfortable harness with airbag protector designated for pilots who like very light, the safest and space-saving harness.

Storage space in METEOR 2 was increased significantly as well as comfort of the harness.

Cell-construction of the airbag protector guarantees perfect protection for the pilot. Excellent result of 10 G during DHV tests is the best result ever received and proves the highest safety standards.

There are used high quality materials as durable light nylon fabric and ultra-light buckles that significantly lower the weight.
